

**Product  
overview**

Groove is a semi-rigid acoustic panel, router cut with a series of precise, angular designs that bend and distort light. Available in 1/2" and 1" thicknesses, Groove panels are lightweight—made from 100% polyester fiber. Choose a single color for a tone-on-tone effect, or combine two colors with Duet to create a two-tone effect.

Install as per Autex Acoustics recommendations. Install instructions are included in each pack, or available on the website. In situations where product is being installed near fire protection systems (e.g. sprinklers or fire alarms) relevant building codes, standards and design rules must be adhered to.

Please consult the project engineer and relevant expert such as a fire protection engineer. If Groove is to be specified for use other than as a wallcovering, please seek guidance from your Autex Acoustics account manager.

## Acoustic performance

Groove is specifically designed to reduce and control reverberated and echo noise in building interiors. Groove is made from Cube as the base material.

Graph presents third octave sound absorption coefficients (according to ISO 354 measurement of sound absorption in a reverberation room). The NRC rating is determined as the arithmetic average of the absorption coefficients measured by one-third octave bands centered on 250 Hz, 500 Hz, 1000 Hz and 2000 Hz and rounded to the nearest 0.05.

#### Water vapour sorption

ASTM C1104 / C1104M-13a

Test conditions: 49°C, 95%RH

Water vapour absorbed and adsorped after 4 days: 0.4% by weight

#### Impact resistance

ISO 7892:1988

#### Hard body impact

There is no surface damage or penetration to Groove when subjected to hard body impacts. When adhered to 10 mm plasterboard, the system can resist a 9 joule impact. This is equivalent to the impact of a 0.5 kg object dropped from a 2 m height. A small indentation might be observed when subjected to an impact equivalent to the impact of a 0.5 kg object dropped from a 0.5 m height.

#### Soft body impact

There is no surface damage or penetration to Groove when subjected to soft body impacts. When adhered to 10 mm plasterboard, the system can resist a 70 joule impact.

This is equivalent to the impact of a 50 kg object dropped from a 150 mm height.

#### Microbial resistance

ASTM G21-15

Growth rating: 0 (No growth)

Groove does not promote the growth of molds and mildew.

#### Color fastness to light

Groove is suitable for indoor use only. Light fastness is dependent on use and exposure. Groove has been evaluated to the following standard:

ISO 105-B02:2014

Rating: 6 (Highest = 7)

#### Color fastness to rubbing

ISO 105-X12:2016

Dry rating: 4-5 (Highest = 5)

Wet rating: 4-5 (Highest = 5)

#### Pattern repeat

Non-woven. No pattern repeat but product has directional grain. Product may vary from samples and batch to batch due to fiber blending and lay-up, which is an inherent feature of this product.

#### Fabric care

Blot spills from fabric quickly. Wipe with a damp cloth. Avoid rubbing and excessive amounts of water as this will affect the finish. Use carpet or upholstery shampoo as directed.

Blot with a clean dry cloth after each application of solution. Custom printed Groove requires the services of a specialist cleaning company. Refer to the Autex Acoustics Care and Maintenance Guide for more information.
